

Carbon Credits FAQ's

What are carbon credits?

Carbon credits are like "climate-friendly permits" that allow someone to release a certain amount of carbon dioxide (CO₂) into the atmosphere while compensating those emissions by funding projects that capture or reduce those CO₂ emissions, or to compensate for emissions by funding projects that reduce emissions elsewhere. Think of them as a way to "balance" your environmental impact by investing in climate action.

How do they work?

They can be used in a few ways:

1) TO OFFSET EMISSIONS

Businesses can buy carbon credits to compensate for the emissions they produce, essentially "balancing out" their environmental impact.

2) IN REGULATED MARKETS

Governments may set limits on emissions, and businesses need to acquire enough credits to meet those limits.

Why are they used?

They provide an incentive for companies to reduce their emissions and contribute to a more sustainable future.

Where do they come from?

Carbon credits are issued by projects that reduce or remove emissions, such as:

RENEWABLE ENERGY PROJECTS

Switching from fossil fuels to renewable sources like solar or wind.

FORESTRY AND CONSERVATION PROJECTS

Protecting or planting trees to absorb CO₂ from the atmosphere.

GREENHOUSE GAS CAPTURE

Technologies that capture and store CO₂ emissions.

What Does This Mean to Kaska?

🌲 WHEN DID KASKA START THIS WORK?

Kaska started this work in 2021

🌲 WHAT DOES KASKA HAVE TO DO TO HAVE A CARBON OFFSET PROGRAM?

Kaska have to negotiate a Atmospheric Benefits Agreement with the Province of BC.

🌲 WHAT ARE THE BENEFITS TO THE KASKA?

Kaska will benefit financially from selling carbon credits to companies. Kaska will benefit through jobs.

🌲 WHAT KASKA COMMUNITIES WILL BENEFIT?

All five of the Kaska communities will benefit from the carbon offsets program.

🌲 HOW WILL THE BENEFITS BE DIVIDED?

The benefits will be divided equally between all five communities with a percentage going to a company that will assist Kaska in managing the program - Carbon Ethics.

🌲 WHY DO WE NEED CARBON ETHICS?

Carbon Ethics will provide the expertise required to manage the forest as well as assist in getting companies to buy the credits from Kaska.
